

About the program

Today's automotive market is vast and diversified. This has created a high demand for a new generation of automotive technicians. These professionals are required to have in-depth knowledge of computers and technology in addition to traditional mechanics. At The Carroll Shelby Automotive Technology Program at NTCC, we offer both certificates and degrees to help you meet your individual career goals in a year and a half or less.

Automotive Technician Certificate

Covers all eight areas of training required to obtain ASE certification. This certificate can be completed in just 32 weeks and evening courses are available.

Associate Of Applied Science Degree

Students complete general academic classes in addition to the Automotive Technician Certificate classes. Students graduate with a full Associate's degree.

Mod Shop Technician Training

This elite training program will prepare ambitious students to take their career to the next level. After completing the Automotive Technician Certificate, students will complete intensive, hands-on training that will prepare them for a career in a mod shop. Areas of study include:

- **Engine & Powertrain Modification**
- **Performance Tuning**
- **Body and Chassis Modification**

The Carroll Shelby Automotive Technology Program

Carroll Shelby's contributions to the automotive industry are legendary. Now, you can be trained at the only automotive technology program bearing the Shelby name. At NTCC, you will get the hands-on experience needed to achieve your career goals from a program supported and endorsed by one of the most respected names in the industry.

About NTCC

Northeast Texas Community College is located in a rural setting near Mount Pleasant, Texas - approximately two hours east of Dallas. The sprawling campus covers more than 300 acres and serves as the primary institution of higher learning for the area. NTCC offers athletics, an active campus life and on-campus housing.

What to Expect

The curriculum of the Shelby Automotive Technology Program is designed with one goal in mind - to prepare students for the workforce. Our classes and hands-on training will prepare students in the following areas.

- Brakes
- Electrical/Electronic Systems
- Engine Performance
- Suspension & Steering
- Automatic Transmissions and Transaxles
- Engine Repair
- Heating & Air Conditioning
- Manual Drive Train & Axles

The Next Level

Automotive Mod Shop Technician Program

For students looking to take their career to the next level, NTCC offers an elite training program designed to prepare top students to transform stock vehicles into true high-performance machines.

- Students can apply for the Mod Shop program upon completion of the Automotive Technician Program
- Students attend the high-performance academy during the summer after graduation
- The next fall, students will complete fabrication training and complete an internship at an approved Mod Shop

*As part of the training students
will modify at least one performance
vehicle as a class project*
